## FOREWORD

- AIMS** The two main objectives of this project, which was supported by the King's Fund from June 1969 to September, 1972, were to collect information on the service offered in seven diverse local authorities of the country and to involve the providers of service in a systematic examination of it. Both these aims have been achieved.
- METHOD** The representatives of Hounslow, Gateshead, Hull, Nottingham, Oxford, East Sussex and West Suffolk formed themselves into a Group under the chairmanship of Dr. M.G. Spark, a general practitioner. The Group now identifies itself as Revans' Participative Research Group (R.P.R.G.). The members of this Group helped the Research Officer, Ali Baquer, in the design of the study, construction of questionnaires, collection of data, and finally in suggesting the methods of analyses of the information gathered. Since the project was undertaken at a time when a great many organisational changes were taking place part-time researchers were employed to help on various aspects of the research.
- SAMPLE** A random sample of the mentally handicapped living in the community and under the age of 30 was drawn from the seven areas. The questionnaires were then administered on their parents, general practitioners, mental welfare officers, health visitors and school teachers. The records kept at the then mental health departments were also examined through the use of a questionnaire. The information thus collected was coded on standard 80 column data sheets and transferred on I.B.M. cards. The data was then processed on computer at the London Hospital Computer Centre.
- DATA** A selection from the computer analysis of the data is now being presented in 5 volumes:

Volume I consists information collected from the questionnaires addressed to the parents (THC 72/555) "table numbers prefixed by P"

Volume II presents an analysis of information collected from general practitioners (THC 72/556) "table numbers prefixed by G"

Volume III deals with the answers given by the mental welfare officers (THC 72/557) "table numbers prefixed by M.W.O."

Volume IV presents the replies of the health visitors and teachers (THC 72/558) "table numbers prefixed by H.V's and T"

Volume V comprises the findings from the records kept on the cases in (THC 72/559)

## PUBLICATIONS

The final report, entitled "I Thought They were Supposed to be Doing That" consisting of the main findings, and a description of methods used, has been presented to the King's Fund to be considered for publication in a book form.

Apart from this book it is hoped that a number of other publications, in the form of articles and books, will be prepared by members of Revans' Participative Research Group as well as others interested in making use of the experience and findings of the project. It will be appreciated if copies of such articles/books could be sent to Miss Janet Craig, Assistant Director, The Hospital Centre, 24 Nutford Place, London, W1 who has agreed to co-ordinate the activities of the Group after the conclusion of the project on 30th September, 1972.

Copies of the five volumes of analysed data are being made available to the Library at the Hospital Centre, London and:

Town Clerks  
Directors of Social Services  
Medical Officers of Health

in the seven areas respectively.

Those wishing to make use of the data presented in these volumes are requested to acknowledge Revans and Baquer's project on "Co-ordination of Services for the Mentally Handicapped."

Ali Baquer,  
Research Officer to the  
Working Party.

September, 1972.  
Hospital Centre,

## NOTES ON INTERPRETING THE TABLES

1. "No Information" category.  
This category means that no reply to the question was given or the response was irrelevant for this table.
2. Some of these tables are summary tables in that they total all the answers provided to a particular question. For many questions, the respondent gave more than one answer, for example, in the question, what kind of support is now being provided to the family, the respondent might list two or three types of support. Since the table will summarise the total number of each type of support provided, it is possible for the total of all types of support to exceed the number of cases being surveyed. This situation arises only where more than one answer has been given to the one question.
3. It will be necessary to remember the number of respondents applicable to each volume of the data, for they vary from volume to volume. Although there were 212 cases in our full sample, we only had usable returns from 204 parents, 147 general practitioners, 169 mental welfare officers, etc. The number of respondents applicable to each area is given at the commencement of each volume.

## LIST OF ABBREVIATIONS USED

### Areas

HO - Hounslow  
GA - Gateshead  
HU - Hull  
NT - Nottingham  
OX - Oxford  
ES - East Sussex  
WS - West Suffolk

### Agencies

G.P. - General Practitioner  
H.V. - Health Visitor  
M.O.H. - Medical Officer of Health  
M.W.O. - Mental Welfare Officer  
L.E.A. - Local Education Authority  
D.R.O. - Disablement Resettlement Officer  
J.T.C. - Junior Training Centre  
A.T.C. - Adult Training Centre

### Others

S.N. - Sub-normal or mentally handicapped  
S.S.N. - Severely Sub-normal or Severely Handicapped  
E.S.N. - Educationally Sub-normal

RESPONSE TO GENERAL PRACTITIONER'S QUESTIONNAIRE

A sample of 212 mentally handicapped people was randomly drawn from the seven areas. The general practitioner for each of these 212 cases was contacted and 147 of them completed the questionnaire. The remaining 75 G.P's declined to participate in the survey, claiming pressure of work or disinterest, or failed to reply at all. The rate of completion for each area is given below:

<u>Cases in each area</u>		<u>Questionnaire's completed</u>
Hounslow	19	11
Gateshead	14	3
Hull	45	41
Nottingham	46	25
Oxford	23	16
East Sussex	45	33
West Suffolk	20	18
	<hr/>	<hr/>
TOTAL	212	147
	<hr/>	<hr/>

No information	2	1	11	5	3	7	4	33

QUESTION: Under what circumstances would you advise admission of a mentally subnormal person for long term care?

# CONDITIONS FOR DISCHARGE OF PATIENTS

	HO	GA	HU	NT	OX	ES	WS	TOTAL
Patient should not require intensive nursing care, should be able to live out in the community	1	2	5	3	2	3	4	20
Parents should be able to cope	4	2	7	8	1	8	3	33
Supportive community services should be available	5	2	15	13	4	9	4	52
Hostel accommodation should be available	3	2	11	2	4	5	-	27
Patient should not be discharged	-	-	1	-	2	-	1	4
Don't know	-	-	-	1	9	-	-	10
No information	2	-	11	6	3	12	7	41
Better education in the community about M.H.	-	-	3	-	-	3	-	6
More financial help to family	-	-	1	-	-	-	-	1

QUESTION: It is often said these days, that a number of patients in the subnormality hospitals should live in the community. As a GP what conditions would you like to see before such patients could be discharged?

# REASONS FOR GENETIC COUNSELLING

	HO	GA	HU	NT	OX	ES	WS	TOTAL
If there is a mongol child in the family	4	2	2	2	1	1	1	13
If there are congenital abnormalities in family	2	1	14	1	-	5	1	24
If there is epilepsy or diabetes	4	-	1	-	-	-	-	5
If parents ask for it	4	1	11	3	7	5	1	32
If parents are around 40 years or over	1	-	-	1	-	-	-	2
If there is a "family history" of subnormality	1	1	11	11	10	16	3	53
Other reasons	5	-	3	4	1	3	3	19
Don't know	2	-	2	-	-	-	1	5
No information	1	-	10	8	3	8	10	40

QUESTION: Under what circumstances would you offer facilities of genetic counselling to a couple?

HAS GP ARRANGED GENETIC COUNSELLING

	HO	GA	HU	NT	OX	ES	WS	TOTAL
No, never	5	3	23	14	6	15	8	74
Used services once	1	-	4	5	2	6	3	21
Used service between 2 - 5 times	2	1	5	2	4	7	2	23
Used services between 6 - 9 times	1	-	-	1	1	-	1	4
Used services a "couple of times"	2	-	-	1	-	-	-	3
No information	1	-	9	2	3	5	4	24

QUESTION: Have you arranged genetic counselling for any parents in the past five years?

HOW EARLY SHOULD ASSESSMENT BE MADE?

	HO	GA	HU	NT	OX	ES	WS	TOTAL
At birth	2	-	2	3	-	4	1	12
At the time of immunisation - at 6 months	2	-	3	2	-	3	1	11
If the development of child is not normal	2	2	11	1	1	1	4	22
"As soon as possible"	2	1	1	11	9	14	3	41
Under the age of 2 years	-	-	9	3	2	1	1	16
Under the age of 4 years	-	-	3	-	-	1	1	5
At school-going age	-	1	2	-	1	4	3	11
Never one isolated assessment - it should be gradual	3	-	-	1	-	-	1	5
No information	1	-	10	4	3	5	3	26

QUESTION: How early in childhood should an assessment of mental handicap be made?

PERSON WHO SHOULD IDENTIFY RISK AND ARRANGE ASSESSMENT

	HO	GA	HU	NT	OX	ES	WS	TOTAL
Parents	2	1	-	-	3	1	1	8
GP	9	3	24	9	11	18	10	84
MOH	-	-	-	-	-	1	1	2
School, school medical officer	-	-	-	1	-	-	-	1
Health Visitor	-	1	3	2	5	7	2	20
Paediatrician	3	2	16	11	-	6	5	43
Hospital	1	-	1	-	1	-	-	3
Clinic doctor	1	-	2	1	2	2	-	8
No information	1	-	9	7	3	7	3	30
Psychiatrist	-	-	1	-	-	1	1	5
Whoever assesses the child	1	-	1	-	-	2	1	5

QUESTION: Who should be able to identify the risk and arrange the assessment?

WHO SHOULD PREPARE THE PARENTS?

	HO	GA	HU	NT	OX	ES	WS	TOTAL
GP	11	4	26	18	13	24	15	111
Health Visitor	1	-	-	-	-	2	1	4
Paediatrician	2	2	12	8	2	7	3	36
Hospital	-	1	-	-	-	-	-	1
No information	1	-	9	3	3	7	3	26
Psychiatrist	-	-	-	1	-	1	-	2
Whoever assesses the child	2	-	4	-	-	-	-	6

QUESTION: Who should have the main responsibility of disclosing the nature of the handicap to the family and preparing the parents to accept it?

IS GP ADEQUATELY TRAINED IN THE DEVELOPMENT ASSESSMENT?

	HO	GA	HU	NT	OX	ES	WS	TOTAL
Yes	-	2	15	8	6	6	3	40
No	2	2	17	15	7	23	12	78
No information	10	-	9	2	3	4	3	31

QUESTION: Do you consider yourself adequately trained in the development assessment of young children in the early detection of mental handicap?

MEASURES TO IMPROVE CO-ORDINATION

	HO	GA	HU	NT	OX	ES	WS	TOTAL
Satisfied with existing conditions	1	1	9	3	6	7	1	28
Reports from paramedical services	1	-	1	-	-	1	-	3
Reports from hospitals	2	-	-	1	1	-	-	4
Central and up-to-date record card on the handicapped	-	-	2	1	-	1	1	5
Closer relationship between services	4	3	14	8	6	9	3	47
Case conferences	1	2	2	1	-	-	-	6
All services should be under one agency	-	-	5	7	1	5	2	20
Don't know	2	-	2	-	-	2	-	6
No information	3	1	9	8	3	10	10	44
Better health at schools/L.E.A.	-	-	1	-	-	-	1	2

QUESTION: In your view what measures could be taken to improve the co-ordination of services for the mentally subnormal?

SERVICES OFFERED BY SUBNORMALITY HOSPITALS

	HO	GA	HU	NT	OX	ES	WS	TOTAL
